EXPERIENCE

Kazam EV Tech Pvt Ltd Associate Product Manager B2C & B2B2C

May 2025 – Present
Bengaluru

- Drove **140% MAU growth** in 3 months by revamping home screen UX with quick filters, unifying all user flows into a single screen, and executing charger sanity workflows to fix broken onboarding for **105K stagnant users**.
- Cut session drop-off by **35%** and lifted D7 retention from **22% to 31%** by integrating OCTT testing into charger onboarding to catch OCPP protocol failures at source and rebuilding the funnel via cohort analysis.
- Grew user acquisition **50%** and daily wallet recharge **65%** (Rs. 9K→Rs. 14K) by launching a **Refer & Earn loop** with dual-incentive economics tuned to the auto-rickshaw driver persona; led cross-functional team of 9 across 4 on-schedule releases.
- Eliminated **Rs. 50K/month** rolling stuck-payment leak by designing a **UPI checkout** on PayU + Razorpay rails targeting sub-20s transaction time, removing OTP friction and resolving Rs. 2.5L in cumulative stuck transactions.

B2B & Platform

- Reduced support ticket volume **35%** and resolution time **28%** by defining and shipping a **GenAI-powered CMS Agent** (LLM + RAG over internal KB) deployed across CX, ops, sales, and field teams.
- Accelerated enterprise settlement cycles **15%** by architecting **BBPS integration** and post-paid/split-settlement flows, unblocking cash flow for fleet clients and enabling higher-value contract closures.
- Cut fleet admin overhead **~40%** and boosted enterprise repeat usage **20%** by launching a **corporate wallet** with subscription billing and coupon engine across 50+ accounts.
- Improved revenue per charger **18%** by piloting **dynamic time-based tariffing**, mapping slot-level pricing to demand windows derived from session data.

FuelBuddy Associate Product Manager

Aug 2024 – Mar 2025
Gurugram

- Improved operational efficiency **28%** and cut support tickets **22%** by owning **B2B OMS and shift scheduling** end-to-end across 3 cities and 200+ daily merchants with automated workflows.
- Lifted onboarding completion **35%** and cut time-to-first-order from **4 days to under 36 hours** by running 20+ merchant discovery interviews, surfacing the top 3 friction points, and redesigning the UX.
- Drove **17% engagement uplift** by building a rigorous **A/B testing cadence** on GA4, Mixpanel, and SQL across acquisition and activation funnels; sustained **92% sprint delivery**.
- Cut merchant task completion time **45%** and scaled to **3 new cities** in a quarter by redesigning the **ops dashboard** around real-time order status, cards, and filters.

PROJECTS

Mufasa | AI-Native Fitness & Lifestyle PWA | mufasa.jhaharsh.in

- Generic Indian fitness apps ignore personal context; personal trainers cost **Rs. 3–8K/month**, pricing out most users — no AI-native alternative existed.
- **Designed and shipped** a full-stack PWA **solo** on React, TypeScript, Supabase, and Gemini 2.0 Flash; plan engine **branches on 10+ user signals** (goal, diet, equipment, budget, injury history) across **3 AI models** with real-time macro adaptation, PR tracking, and cross-device sync — **0→1 without an engineering team**.

SKILLS

Product: Roadmapping, PRD Writing, A/B Testing, Funnel Analysis, Growth Loops, Onboarding Optimisation, OKRs, User Research

AI / ML: Gemini API, LLM Product Design, RAG Systems, Prompt Engineering, AI-Native Development

Analytics & Tools: SQL, GA4, Mixpanel, GTM, Power BI, Jira, Figma

Engineering: Python, PostgreSQL, MongoDB, REST APIs, React, TypeScript, Git, Supabase

EDUCATION

Madan Mohan Malaviya University of Technology, Gorakhpur
B.Tech, Electrical Engineering · CGPA: 7.30

Dec 2020 – Aug 2024

Spring Dale College, Lucknow
ISC, Physics, Chemistry & Math: 90.50%

April 2017 – May 2019
